 - **Methodologies:** Agile Scrum, ITIL, SDLC, DevOps Practices
 - **ORM:** ADO.NET, EF & EF Core
-

PROFESSIONAL EXPERIENCE

Associate Software Consultant – NEXXOFT INFOTEL

June 2023 to present

KEY PROJECTS & RESPONSIBILITIES

Commercial Off-The-Shelf (COTS) Solutions

Oct 2024 – Till Date

Tech Stack: .NET Core, Web API, C#, MVC, React.js, Microservices, SQL, ServiceNow, Git, Claude & MS Azure

Description & Responsibilities:

- **Food COTS** is a strategic enterprise initiative by Tyson Foods to **modernize and streamline business operations** by transitioning from **custom-built legacy applications** to **Commercial Off-The-Shelf (COTS) solutions**.
- **Delivered** L2/L3 production support for **enterprise-grade .NET applications (MRS, FOPS, ESP, eShop, FMR, FMS, Liquid UI,,)**, ensuring 99.9%+ availability for **global users**.
- **Developed** React UI & API Integration for **ESP** and **MRS** new Modules.
- **Led** incident management and root cause analysis (RCA), **reducing recurring production issues and improving system stability**.
- **Performed** advanced troubleshooting and bug fixing **across application, API, and database layers**.

- **Implemented** proactive monitoring, health checks, and log analysis, **minimizing downtime and improving response time.**
- **Optimized** SQL queries and database performance, **improving response time for key business operations.**
- **Handled** ServiceNow tickets (Incidents, Changes, Requests) **in alignment with** ITIL best practices.
- **Collaborated with** cross-functional teams (**Business, QA, Infra, DB**) **to resolve high-priority production issues.**
- **Created and maintained** knowledge base documentation, **reducing resolution time and improving team efficiency.**
- **Ensured adherence to** SLA, audit, and security compliance standards **across all supported systems.**

UFacts - Cloud Modernization

July 2023 – Sep 2024

Tech Stack: .Net Core, Web API, C#, React, SQL, Micro Service, Git Copilot & MS Azure

Description & Responsibilities:

- **uFACTS** – uFACTS is utilized to automate the Unemployment Insurance framework for Claims and Tax services.
- The **uFACTS** Solution offers the fullest and most comprehensive capabilities in the marketplace.
- It is a web-based system architecture that provides robust tax and benefits functionality to uFACTS without compromising its capacity for necessary core services.
- Multiple services like Benefits, Claims, Core, Employer, Monetary, NonMonetary are involved in the **uFACTS** process.
- End to End process of Full Stack Development as part of Agile Methodology.
- Team Development, CICD, Problem Resolution, Collaboration
- Creating optimized and efficient API services and implementing the logics.
- Integrating APIs with the Frontend and managing the end-to-end flow.

EDUCATION BACKGROUND

- **BE Mechanical** , King College of Engineering, Pudukottai, TN, India– (2019–2023) – CGPA: 8.01/10
- **HSC** , St. Joseph’s Matric Hr. Sec School, Thanjavur, TN, India – (2018 – 2019) – 63.8%
- **SSLC** , Kalyana Sundaram Hr. Sec School, Thanjavur, TN, India – (2016–2017) – 76.4%
